English: Proficient

CERTIFICATIONS

- Google Cloud Digital Leader
- React - The Complete Guide 2023 (React Router, Redux, Next.js)
- The Complete JavaScript Course: From Zero to Expert

EXPERIENCE

- Full-Stack Developer | Konecta, Hybrid

- Dec 2024 to Present
- Developed and deployed projects using the Serverless Framework with Node.js and AWS.
 - Utilized AWS Lambda, DynamoDB, API Gateway, and CloudFront to build a scalable and cost-efficient architecture.
 - Integrated the system with Keycloak for authentication and access management.

- Full-Stack Developer | Scale By AI, Part Time, Hybrid

- Sep 2024 to Feb 2025
- Contributed to the development of "Wilde," an AI marketing agent built using Node.js and Express, at Scale By AI, a startup.
 - Developed key features including AI-driven content generation (articles, video scripts, and LinkedIn posts), email automation, and AI-humanized text to enhance marketing strategies.

- NodeJs & Spring Boot Backend Developer | The Egyptian E-Learning University, On-site

- Jul 2022 to Sep 2024
- Responsible for the server side of the university Web Portal and application using Node, Express, MongoDB
 - Integrating the web and application with Salesforce using SOAP API and Spring Boot server
 - Integrating the ERP system with the time attendance devices across all the University branches

- Frontend Developer Elnady Engineering, Remotely

- May 2022 to Jul 2022
- Contributed to the development of Sidlab, a software for Mechanical Engineers, using React, Redux, and Electron.js.
 - Developed the keyboard shortcuts feature to enhance user experience and efficiency.

LIVE PROJECTS

Wilde - AI Marketing Agent Node.js/Express/AWS EC2, ElasticCache (Redis)

- LIVE LOOK
- Developed key features of "Wilde," an AI-powered marketing agent, at Scale By AI, a startup.
 - Designed a scalable backend using Node.js and Express, optimizing performance with AWS EC2 and ElasticCache (Redis).

EELU App Node.js / Flutter

- LIVE LOOK
- Database Design:** Manages students, attendance records, and optional departments for detailed tracking.
 - Backend (Node.js):** Implements secure authentication, authorization and manages attendance via RESTful APIs, and handles user/department data.
